

SHIVAM BHATOOLAUL

✉ shivambhatoola@outlook.com 📞 (647) 571-4973 📍 Mississauga, ON 🌐 <https://shivambhatoola.github.io>

PROFILE

DevOps Engineer with experience designing, developing, and maintaining Salesforce and cloud-based solutions in the financial sector. Skilled in using Python and GitHub Actions to automate workflows and improve system efficiency. Proven ability to translate business requirements into technical solutions and collaborate effectively with cross-functional teams. Fully bilingual in French and English.

SKILLS

Languages: Python, Java, Apex, C, JavaScript, HTML/CSS

Databases: SQL (Postgres, Lite), Salesforce

Frameworks and Libraries: Pandas, NumPy, Matplotlib, Streamlit, Requests, React, LWC

CI/CD and Developer Tools: Git, GitHub Actions, Jenkins, Jira, Postman, VS Code

EXPERIENCE

Royal Bank of Canada (RBC) — Toronto and Mississauga, ON

DevOps Engineer

Sep. 2024 – Present

- Migrated Salesforce CI/CD pipeline from Jenkins to GitHub Actions, implementing 7+ automated workflows (e.g., sandbox management, deployments, security testing) to eliminate manual handoffs and accelerate promotion from development to production
- Architected and deployed a new database orchestration system for asynchronous jobs in the pipeline, improving server availability, monitoring capabilities, access control and error handling, while enabling subscription-based email notifications for workflow events
- Automated Jira ticket updates post-deployment via API integration, cutting manual announcements completely and increasing team trust through deployment transparency
- Optimized pipeline test execution, reducing pull request validation time by ~92% (2 hours → 10 minutes) by detecting and selectively running only required test classes
- Prevented recurring merge conflicts and pull request delays by implementing a custom XML-sorting Python script in the pipeline
- Delivered 30+ enhancements in Salesforce's full-stack cloud environment (e.g., Flows, Apex, LWC, HTML, JavaScript) and supported developers through GitHub code reviews, accelerating feature delivery during tight release windows

Functional Designer

Sep. 2023 – Sep. 2024

- Translated 90+ business requirements into actionable developer stories for RBC's \$250M Salesforce-powered Client 360 platform used by over 30 000 advisors
- Drove 20% increase in Client 360 CRM adoption by designing Jira tickets that surfaced client financial data (e.g. Credit Cards, Investments) directly in Salesforce, eliminating reliance on legacy systems
- Streamlined metadata refinement by scripting Salesforce metadata scans and refactoring constants across 70+ repository files with Python

Analyst Intern

Summer 2019, 2020, 2021

- Predicted monthly call volumes to RBC's Advice Centre with 94% accuracy by building a time-series forecasting model using Prophet and SARIMA on historical call data
- Saved 20+ hours/week of manual work during COVID-19 by automating scheduling conflict resolution in new WFH processes using Python
- Empowered Workforce Management decision-making by delivering actionable insights through custom SQL queries against RBC's call routing system

EDUCATION

University of Toronto — Toronto, ON

Sep. 2018 – Jun. 2023

Honours Bachelor of Science (HBS) in Computer Science with High Distinction

- **GPA:** 3.68/4.00
- **Honours and Awards** Dean's List Scholar (2020-2023), University of Toronto Scholar Award

CERTIFICATIONS

Salesforce's Platform Developer I

Jun. 2025
